C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme aims to generate long term capital appreciation by investing in a dynamic mix of equity and equity related instruments across market capitalizations. The Scheme would invest in companies based on various criteria including sound professional management, track record, industry scenario, growth prospects, liquidity of the securities, etc. The Scheme will emphasise on well managed, good quality companies with above average growth prospects. There will be no particular bias towards any market cap size or any sector. The Scheme may also invest a certain portion of its corpus in foreign securities.

The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include efficient companies having an efficient business model purchased at efficient prices and held with efficient cost and are able to compound consistently.

The scheme by utilising a holistic risk management strategy will endeavour to manage risks associated with investing in equity markets. The scheme has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks.

- i. Quality Risk - Risk of investing in unsustainable / weak companies.
- ii. Price Risk - Risk of overpaying for a company
- iii. Liquidity Risk - High Impact cost of entry and exit
- iv. Concentration risk - Invest across the market capitalization spectrum and industries/ sectors
- v. Volatility Risk - Volatility in price due to company or portfolio specific factors
- vi. Event Risk - Price risk due to a company / sector specific or market event

The scheme may also seek participation in foreign instruments to achieve optimal portfolio construction.

SAMCO's proprietary HexaShield Investment framework

SAMCO's HexaShield framework is a strategy to put to work money with businesses that can endure and survive in a variety of stressful situations and generate superior long-term risk adjusted returns. It relies on understanding the resilience of companies based on SAMCO's HexaShield framework tests and evaluates every company and institution on 6 most important facets of risks and stress. These tests are meant to measure every company's ability to maintain enough buffer to stay afloat under adverse economic scenarios. The HexaShield tests are also designed to understand if these companies can generate high cash returns on capital employed in a variety of economic conditions including degrowth, recession, etc. This rigorous scientific and statistical process helps get an understanding of risks, reduces room for bias and beliefs, inculcates discipline and enhances the probability of success. Companies that pass the criteria often exhibit 2 characteristics - they survive as a going during economic distress and operate as true compounding machines in normal economic cycles.

The 6 facets of testing that are followed in our HexaShield framework are:

1. Competitive Strength and Pricing Power
2. Balance Sheet and Insolvency
3. Re-investment and Growth
4. Corporate Governance and Leadership
5. Cash Flow
6. Regulatory

The HexaShield tested framework puts businesses through simulated pressure scenarios to filter out the businesses that stand tall and emanate excellence despite any adversity. It observes if companies pass the test on various fundamental factors and only the ones that cross the benchmark percentage hurdle in all 6 pillars will be eligible to

be a part of the investment universe. The companies which fail to cross the benchmark level on even a single pillar will fail the test. Samco Mutual Fund endeavors to invest in only the most capital efficient companies. Samco's HexaShield tested framework defines and quantifies the definition of a high-quality business. The investable universe is restricted to a limited set of businesses that passes the criteria and construct a portfolio that scores highly under the HexaShield Framework.

Portfolio Turnover Policy

The Scheme being an open-ended scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, it will be endeavoured to keep the turnover as low as possible. The fund manager will endeavour to minimize portfolio turnover to maximize long term gains. However, it is difficult to estimate with reasonable accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The Scheme performance would be benchmarked against **Nifty 500 TRI**

Justification for use of benchmark

The Fund's strategy is to invest in a diversified portfolio of companies across sectors. The Fund will also have the flexibility to invest in companies across the market capitalization spectrum and as such, the constituents of the Nifty 500 Index TRI reasonably represent the universe for building the portfolio of the scheme.

Further, pursuant to SEBI Master circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, specified a two-tiered structure for benchmarking of schemes, and stipulated AMFI to prescribe Tier-1 benchmarks for mutual fund schemes in the industry. Based on AMFI's recommendations, the Tier-1 benchmark is chosen as Nifty 500 TRI Index.

The Trustee/AMC reserves the right to change the benchmark for the evaluation of the performance of the Scheme from time to time, keeping in mind the investment objective of the Scheme and the appropriateness of the benchmark, subject to SEBI guidelines and other prevalent guidelines.

The returns are based on growth option NAVs. *The data is as on April 30, 2025. The benchmark for the Scheme is NIFTY 500 Index TRI. In case, the start date or the end date of the concerned period is a non-business day, the NAV of the previous business day is considered for computation of returns.*

III. OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per Unit under the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Assets Value (NAV) of the Units under the Scheme shall be calculated as shown below:

NAV =	Market Value of the scheme's investments + other assets (including accrued interest) - all liabilities except unit capital & reserves
(Rs. Per unit)	Number of units outstanding at the end of the day

For example, if the net assets of the Scheme are Rs.149,36,40,000 and units outstanding are 100,00,000, then the NAV per unit will be computed as follows: $149,36,40,000 / 10,00,00,000 = \text{Rs. } 14.94$ per unit. (rounded off to two decimals).

The NAV shall be calculated up to two decimal places. However, the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Separate NAV will be calculated and disclosed for each Plan / Option. The NAVs will be calculated and disclosed on all the Business Days.

While determining the price of the units, the mutual fund shall ensure that the repurchase price of an open ended scheme is not lower than 95 per cent of the Net Asset Value.

Valuation of the scheme's assets, calculation of the scheme's NAV and the accounting policies & standards will be subject to such norms and guidelines that SEBI may prescribe from time to time. For the detailed Valuation Policy and the accounting policy of the AMC, please refer the Statement of Additional Information.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Investors can refer 'Total Expense Ratio of Mutual Fund Schemes' section on <https://www.samcomf.com/total-expense-ratio> for Total Expense Ratio (TER) details.

Illustration of impact of expense ratio on scheme's returns

For any scheme, NAV is computed on a daily basis factoring in all the assets as well as liabilities of the Scheme (including expenses charged). Expenses charged to the Scheme bring down its NAV and hence the investor's net returns on a corresponding basis.

Illustration of expenses and impact on the return	
Opening NAV Per Unit for the Day (a)	10.0000
Closing NAV Per Unit for the Day (b)	11.0000
NAV Movement Per Unit (c = a – b)	1.0000
Flat Return for the Day after expenses (d = (c / a) %)	10.00%
TER % (e)	2.00%
Expenses for the Day (f = (b * e)/365)	0.0006
Expenses for the Day % (g = (f / b) %)	0.0055%
Flat Return prior to expenses for the Day (h = d + g)	10.0055%

Please Note:

The above illustration is purely given to explain the impact of the expense ratio on a scheme's return and should not be construed as an indicative return of the scheme.

Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.

D. LOAD STRUCTURE

Load is an amount which is presently paid by the investor to redeem the Units from the Scheme. This amount net of Goods & Services Tax will be credited back to the Scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, investors may refer to the website of the AMC (www.samcomf.com) or may call at 18001034757 (toll-free numbers) or additional contact number +91 63572 22000 from 9.30 am to 6.00 pm (Monday to Friday).

Pursuant to SEBI Master circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, there shall be no entry Load for all Mutual Fund Schemes.

Type of Load	Load chargeable (as %age of NAV)
Entry Load	Not Applicable
Exit Load	<p>10% of the units allotted may be redeemed without any exit load, on or before completion of 12 months from the date of allotment of units. Any redemption in excess of such limit in the first 12 months from the date of allotment shall be subject to the following exit load:</p> <ul style="list-style-type: none"> • 1% if redeemed or switched out on or before completion of 12 months from the date of allotment of units; • Nil, if redeemed or switched out after completion of 12 months from the date of allotment of unit.

The load structure will be equally applicable to all special products offered under the schemes such as SIP, STP, etc. However, no load will be applicable for switches between the plans under the scheme.

The entire exit load (net of GST), charged, if any, shall be credited to the scheme. The Investor is requested to check the prevailing Load structure of the Scheme before investing.

Pursuant to SEBI Master circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, there shall be no entry Load for all Mutual Fund Schemes.

For any change in Load structure AMC will issue an addendum and display it on the website/Investor Service Centres.

Under the Scheme, the AMC/Trustee reserves the right to change / modify the Load structure if it so deems fit in the interest of smooth and efficient functioning of the Mutual Fund. The AMC/Trustee reserves the right to introduce / modify the Load depending upon the circumstances prevailing at that time subject to maximum limits as prescribed under the Regulations.

The Redemption Price however, will not be lower than 95% of the NAV. Any imposition or enhancement of Load in

future shall be applicable on prospective investments only. The difference between the Redemption price and Sale price at any point in time shall not exceed the permitted limit as prescribed by SEBI from time to time which is presently 5% calculated on the Sale Price.

At the time of changing the Load Structure:

- An Addendum detailing the changes will be attached to Scheme Information Document and Key Information Memorandum. The addendum may be circulated to all the distributors / brokers so that the same can be attached to all Scheme Information Documents and Key Information Memorandum already in stock.
- The addendum will be displayed on the website of the AMC and arrangements will be made to display the addendum in the form of a notice in all the Investor Service Centres and distributors / brokers' office.
- The introduction of the Exit Load along with the details may be stamped in the acknowledgement slip issued to the Investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such Load.
- Any other measure which the Mutual Fund may consider necessary.

The Trustee/AMC reserves the right to change the load structure subject to the limits prescribed under the Regulations. Any change in load structure shall be only on a prospective basis i.e. any such changes would be chargeable only for Redemptions from prospective purchases (applying first in first out basis).

Methodology of calculation of Exit Load and Redemption Amount:

Exit Load: 1% if units are redeemed or switched out on or before completion of 12 months from the date of allotment of units. Nil if units are redeemed or switched out after completion of 12 months from the date of allotment of units.

Amount invested on Jan 01 2024 and Applicable NAV: Rs. 5,000 @ Rs. 10 per unit;

No. of units Allotted on Jan 01 2024: 500

Amount invested on Feb 01 2024 and Applicable NAV: Rs. 11,000 @ Rs. 11 per unit

No. of units Allotted on Feb 01, 2024: 1000

Units redeemed on Jan 02, 2025: 700

Applicable NAV on Jan 02, 2025: Rs. 12 per unit

Exit Load Calculation Methodology (on First-in First Out (FIFO) basis) for the 700 units redeemed on Jan 02, 2025, is given as follows:

- Exit load on 500 units bought on Jan 01, 2024, which has completed more than 12 months on date of redemption viz Jan 02, 2025: Nil
- Exit load on the balance 200 units bought on Feb 01, 2024, which has not completed 12 months on date of redemption viz Jan 02, 2025, is as follows:

Step 1: Applicable NAV * Exit Load applicable in % = Exit Load Amount per unit i.e. Rs. 12 * 1% = Rs. 0.12 per unit;

Step 2: Applicable NAV - Exit Load Amount per unit = Repurchase price per unit; i.e. Rs. 12- Rs. 0.12 = Rs.11.88 per unit.

Calculation of redemption amount:

No. of units redeemed (Total 700 units)	Whether 12 months from date of allotment completed (yes/ no)	Exit Load applicable (in %)	NAV per unit applied after consideration of Exit Load, if any	Total Exit Load Amount (in Rs.) on units redeemed	Redemption amount after exit load i.e. Units*NAV applied
500 units	Yes	Nil	Rs. 12.00	Nil	Rs. 6,000
200 units	No	1%	Rs. 11.88	Rs. 24	Rs. 2,376
Total Redemption Amount →					Rs. 8,376

Note: The above illustration is only given to explanation the methodology of calculation of Exit Load and Redemption Amount. The actual redemption amount would depend on the prevailing Exit Load, applicable taxes, if any, and other terms and conditions mentioned in the scheme documents of the Scheme.

I. INTRODUCTION

A. DEFINITIONS/INTERPRETATION

In this SID, all references to "U.S.\$" or "\$" are to United States of America Dollars and "Rs." are to Indian Rupees.

For detailed description please click the link: www.samcomf.com.

B. RISK FACTORS

i. Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on the various factors and forces affecting the capital markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Samco Flexi Cap Fund is the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹1 lakh made by it towards setting up the Fund.
- Samco Flexi Cap Fund is the first scheme being launched under its management.
- Samco Flexi Cap Fund is not a guaranteed or assured return scheme.

ii. Scheme Specific Risk Factors

- Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors.

Risk factors associated with investing in Foreign Securities

Subject to necessary approvals and within the investment objectives / asset allocation pattern of the Scheme may also invest in permitted foreign securities which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances. It is the AMC's belief that investment in foreign securities offers new investment and portfolio diversification opportunities into multimarket and multi-currency products.

The Scheme may invest in units/securities issued by overseas companies listed on recognized stock exchanges overseas and other securities in accordance with the provisions of clause 12.19 of SEBI Master circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, subject to a maximum of US\$ 1 billion at in the

aggregate at the Mutual Fund level and upto a maximum of US\$ 300 million in overseas Exchange Traded Funds (ETFs) at the Mutual Fund level or such limits as may be prescribed by SEBI from time to time. However, in case the overall industry limit or such other limit as prescribed by SEBI has been breached, the Scheme would temporarily not invest in the overseas securities.

Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme. However, such investments also entail additional risks not only limited to the following.

Country Risk: The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

Currency Risk: Moving from Indian Rupee (INR) to any other currency involves currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee.

Interest Rate Risk: The pace and movement of interest rate cycles of various countries, though loosely co-related, can differ significantly. Investments in securities of countries other than India, the Scheme stand exposed to their interest rate cycles.

Repatriation Risk: The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

Risks associated with Short Selling & Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

Short-selling is the sale of shares or securities that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock/security he shorted and returns the stock/security to the lender to close out the loan. The inherent risks are Counterparty risk and liquidity risk of the stock/security being borrowed. The security being short sold might be illiquid or become illiquid and covering of the security might occur at a much higher price level than anticipated, leading to losses.

Risks associated with investing in Tri-party Repo (TREPS) through CCIL

The Mutual Fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India Limited (CCIL). All transactions of the Mutual Fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The Mutual Fund is exposed to the extent

of its contribution to the default fund of CCIL at any given point in time i.e., in the event that the default waterfall is triggered and the contribution of the Mutual Fund is called upon to absorb settlement/default losses of another member by CCIL, the Scheme may lose an amount equivalent to its contribution to the default fund.

Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

Risks associated with transaction in Units through stock exchange(s)

In respect of transaction in Units of the Scheme through Bombay Stock Exchange ("BSE") and / or National Stock Exchange ("NSE"), allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by NSE and /or BSE and their respective clearing corporations on which the Fund has no control.

Risks associated with Restrictions on Redemption

The Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets. Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.

Risks associated with segregated portfolio

The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange. The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realize any value.
- Listing of units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

C. RISK MITIGATION STRATEGIES

Investments in Equity and equity related instruments and money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigates.

Risk control measures with respect to investment Equity and Equity related instruments

Concentration Risk: Concentration risk represents the probability of loss arising from heavy exposure to a particular group of sectors or securities.

Mitigation: The scheme will try to mitigate this risk by diversifying the investment and keep stock-specific concentration risk relatively low.

Market Risk: Equity and Equity related securities by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.

Mitigation - Market risk is a risk which is inherent to an equity scheme. The scheme will try to reduce the market risk by undertaking active portfolio management as per the investment objective.

Liquidity risk: The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods

Mitigation- As such the liquidity of stocks that the scheme invests into could be relatively low. The scheme will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time.

Risk control measures with respect to Money Market Instruments

Market Risk / Interest Rate Risk: Changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. The price movement up and down in fixed income securities will lead to possible movements in the NAV.

Mitigation - In a rising interest rates scenario the scheme may increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity may be increased thereby mitigating risk to that extent.

Credit risk or default risk: It refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Mitigation- Apart from the basic examination, management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower.

Risk control with respect to investment in Foreign Securities

Since the assets may be invested in securities denominated in foreign currency, the INR equivalent of the net assets, distributions and income may be adversely affected by changes / fluctuations in the value of the foreign currencies relative to the INR.

Mitigation - The scheme shall have the option to enter into permissible instruments (subject to applicable regulations by SEBI/RBI) for the purposes of hedging against the foreign exchange fluctuations.

SEBI/HO/IMD/IMD-SEC-3/P/CIR/2025/15 dated February 12, 2025, has introduced a service platform Mutual Fund Investment Tracing and Retrieval Assistant (MITRA) designed to help investors trace inactive and unclaimed Mutual Fund folios. MITRA platform provides a centralized, industry-wide searchable database, enabling investors to identify overlooked investments or those made by others for which they may be rightful legal claimants. The platform also encourages investors to complete their KYC as per current norms, thereby reducing the number of non-KYC-compliant folios and ultimately leading to a decline in unclaimed Mutual Fund folios.</p> <p>An inactive folio is defined as a Mutual Fund folio where no investor-initiated transactions (financial or non-financial) have taken place in the last 10 years, but unit balances remain available. These may include folios where investors have either consciously chosen to remain invested in an open-ended scheme or have lost track of their investments. There is no adverse consequence for folios appearing on the platform if the investor is aware of their holdings and has intentionally remained invested. The primary objective of MITRA is to assist investors in retrieving forgotten Mutual Fund investments and ensuring their KYC compliance.</p> <p>The MITRA platform will be jointly hosted by the two Qualified RTAs (QRTAs)—Computer Age Management Services Limited (CAMS) and KFIN Technologies Limited—acting as agents for Asset Management Companies (AMCs). It will be accessible via a link on the websites of MF Central, AMCs, AMFI, the two QRTAs, and SEBI, ensuring widespread availability and ease of access for investors.</p>

Post attainment of majority by the minor, the Mutual Fund/AMC will not be obliged to accept any instruction or transaction application made under the signature of the guardian. In case of an application for registration of a systematic transaction facility (Systematic Investment Plan / Systematic Transfer Plan / Systematic Withdrawal Plan or Transfer of Income Distribution cum capital withdrawal), if the end date of the facility extends beyond the date of attainment of majority by the minor, such facility will be registered only up to the date of attaining majority.</p>
