I. INTRODUCTION

A. RISK FACTORS

i. Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on the various factors and forces affecting the capital markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Samco Flexi Cap Fund is the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹ 1 lakh made by it towards setting up the Fund.
- Samco Flexi Cap Fund is the first scheme being launched under its management.
- Samco Flexi Cap Fund is not a guaranteed or assured return scheme.

ii. Scheme Specific Risk Factors

Risks associated with investments in Equities

- Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors.

Risk factors associated with investing in Foreign Securities

Subject to necessary approvals and within the investment objectives / asset allocation pattern of the Scheme may

invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances. It is the AMC's belief that investment in foreign securities offers new investment and portfolio diversification opportunities into multimarket and multi-currency products. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme. However, such investments also entail additional risks not only limited to the following.

Currency Risk:

Moving from Indian Rupee (INR) to any other currency involves currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee.

Interest Rate Risk:

The pace and movement of interest rate cycles of various countries, though loosely co-related, can differ significantly. Investments in securities of countries other than India, the Scheme stand exposed to their interest rate cycles.

Repatriation Risk:

The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

Risks associated with Short Selling & Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

Short-selling is the sale of shares or securities that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock/security he shorted and returns the stock/security to the lender to close out the loan. The inherent risks are Counterparty risk and liquidity risk of the stock/security being borrowed. The security being short sold might be illiquid or become illiquid and covering of the security might occur at a much higher price level than anticipated, leading to losses.

Risks associated with investing in Tri-party Repo (TREPS) through CCIL

The Mutual Fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing

Corporation of India Limited (CCIL). All transactions of the Mutual Fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The Mutual Fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e., in the event that the default waterfall is triggered and the contribution of the Mutual Fund is called upon to absorb settlement/default losses of another member by CCIL, the Scheme may lose an amount equivalent to its contribution to the default fund.

Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

Risks associated with transaction in Units through stock exchange(s)

In respect of transaction in Units of the Scheme through Bombay Stock Exchange ("BSE"), National Stock Exchange ("NSE") and / or Indian Commodity Exchange Ltd. ("ICEX"), allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by NSE, BSE and / or ICEX and their respective clearing corporations on which the Fund has no control.

Risks associated with Restrictions on Redemption

The Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets. Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.

Risks associated with segregated portfolio

The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange. The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realize any value.

- Listing of units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 Investors and no single Investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Mutual Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. The aforesaid conditions should be complied with in each calendar quarter, on an average basis. In case the Scheme does not have a minimum of 20 Investors on an ongoing basis for each calendar quarter, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at Applicable NAV. If there is a breach of the 25% limit by any Investor over the quarter, a rebalancing period of one month would be allowed and thereafter the Investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund at the applicable NAV on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

- In case the AMC or its Sponsor or its Shareholders or their affiliates/associates or group companies make substantial investment, either directly or indirectly in the Scheme redemption of Units by these entities may

have an adverse impact on the performance of the Scheme. This may also affect the ability of the other Unit holders to redeem their Units.

- As the liquidity of the Scheme investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Fund for Redemption of Units may be significant in the event of an inordinately large number of Redemption Requests or of a restructuring of the Scheme portfolio. In view of this, the AMC / Trustee has the right to limit redemptions under certain circumstances - please refer to the paragraph "Suspension/Restriction on Redemption of Units of the Scheme".
- The AMC and/ or its Registrars & Transfer Agent (RTA) reserve the right to disclose/share Unit holder's details of folio(s) and transaction details thereunder with the following third parties: a) RTA, Banks and/ or authorised external third parties who are involved in transaction processing, dispatching etc., of the Unitholder's investment in the Scheme; b) Distributors or sub-brokers through whom the applications are received for the Scheme c) Any other organizations for compliance with any legal or regulatory requirements or to verify the identity of the Unitholders for complying with anti-money laundering requirements.

TREPS receives borrowing limits and initial margin details from CCIL for each member based on cash and/or government securities contributions by respective member. Once the orders are matched and the trade is concluded, the first leg consideration is determined by the system based on the tenor and the repo interest rate of the trade. Members can square off the trades or re-repo (i.e. lend trade can be squared off by borrow trades and vice versa) wherein the second leg settlement date of the squaring off trade is the same business date as the second leg settlement date of original trade. TREPS trades are settled through CCIL's Securities Segment.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme aims to generate long term capital appreciation by investing in a dynamic mix of equity and equity related instruments across market capitalizations. The Scheme would invest in companies based on various criteria including sound professional management, track record, industry scenario, growth prospects, liquidity of the securities, etc. The Scheme will emphasise on well managed, good quality companies with above average growth prospects. There will be no particular bias towards any market cap size or any sector. The Scheme may also invest a certain portion of its corpus in foreign securities.

The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include efficient companies having an efficient business model purchased at efficient prices and held with efficient cost and are able to compound consistently.

The scheme by utilising a holistic risk management strategy will endeavour to manage risks associated with investing in equity markets. The scheme has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks

- i. Quality Risk - Risk of investing in unsustainable / weak companies.
- ii. Price Risk - Risk of overpaying for a company
- iii. Liquidity Risk - High Impact cost of entry and exit
- iv. Concentration risk - Invest across the market capitalization spectrum and industries/ sectors
- v. Volatility Risk - Volatility in price due to company or portfolio specific factors
- vi. Event Risk - Price risk due to a company / sector specific or market event

The scheme may also seek participation in foreign instruments to achieve optimal portfolio construction.

SAMCO's proprietary HexaShield Investment framework

SAMCO's HexaShield framework is a strategy to put to work money with businesses that can endure and survive in a variety of stressful situations and generate superior long-term risk adjusted returns. It relies on understanding the resilience of companies based on SAMCO's HexaShield framework tests and evaluates every company and institution on 6 most important facets of risks and stress. These tests are meant to measure every company's ability to maintain enough buffer to stay afloat under adverse economic scenarios. The HexaShield tests are also designed to understand if these companies can generate high cash returns on capital employed in a variety of economic conditions including degrowth, recession, etc. This rigorous scientific and statistical process helps get an understanding of risks, reduces room for bias and beliefs, inculcates discipline and enhances the probability of success. Companies that pass the criteria often exhibit 2 characteristics - they survive as a going concern during economic distress and operate as true compounding machines in normal economic cycles.

The 6 facets of testing that are followed in our HexaShield framework are:

1. Competitive Strength and Pricing Power
2. Balance Sheet and Insolvency
3. Re-investment and Growth
4. Corporate Governance and Leadership
5. Cash Flow
6. Regulatory

The HexaShield tested framework puts businesses through simulated pressure scenarios to filter out the businesses that stand tall and emanate excellence despite any adversity. It observes if companies pass the test on various fundamental factors and only the ones that cross the benchmark percentage hurdle in all 6 pillars will be eligible to be a part of the investment universe. The companies which fail to cross the benchmark level on even a single pillar will fail the test. Samco Mutual Fund endeavors to invest in only the most capital efficient companies. Samco's HexaShield tested framework defines and quantifies the definition of a high-quality business. The investable universe is restricted to a limited set of businesses that

passes the criteria and construct a portfolio that scores highly under the HexaShield Framework.

PORTFOLIO TURNOVER

The Scheme being an open-ended scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, it will be endeavoured to keep the turnover as low as possible. The fund manager will endeavour to minimize portfolio turnover to maximize long term gains. However, it is difficult to estimate with reasonable accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.

RISK CONTROL

Risk is an inherent part of the investment function. Effective Risk Management is critical to Fund Management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objectives of the Scheme and provisions of the Regulations.

The Fund, by utilizing a holistic risk management strategy, will endeavour to manage risks associated with investing in equity markets. The risk control process involves identifying & measuring the risk through various risk measurement tools. The Fund has identified following risks of investing in equities and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk & description specific to equities	Risk mitigants/ Management strategy
Quality risk - Risk of investing in unsustainable/ weak companies	Investment universe carefully selected to only include high quality businesses
Price risk - Risk of overpaying for a company	"Fair value" based investment approach supported by comprehensive research
Concentration risk	Invest across the market capitalization spectrum and industries/ sectors
Liquidity risk - High impact costs	Control portfolio liquidity at portfolio construction stage
Volatility - Price volatility due to company or portfolio specific	Control risk class/ sector/ stock exposures to control overall factors portfolio volatility
Event risk - Price risk due to company or sector specific event	Understand businesses to respond effectively and speedily to events

Risk control would also include managing risk in order to keep it in line with the investment objective of the Scheme. The AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. The system has inbuilt feature which enables the Fund Manager calculate various risk ratios and analyse the same.

The AMC has experienced investment professionals to help limit investment universe to carefully selected high quality businesses.

The Scheme would invest in a diversified portfolio of equity and equity related securities which would help alleviate the sector/market capitalization related concentration risk.

Whether the distressed security is held in the original portfolio or the segregated portfolio, the value of the investors' holdings will remain the same on the date of actual default of either the interest or principal amount (in case of unrated debt or money market instruments).

Key assumptions:

Let us assume a Scheme consists of 3 Securities (A, B and C). It has two investors with total of 10,000 units (Investor 1 with 6,000 units, Investor 2 with 4,000 units).

Total Portfolio Value of Rs. 30 Lakhs (Each Security invested Rs. 10 Lakh).

Current NAV: 30,00,000/10,000 = Rs. 300 Per Unit.

Suppose Security A is downgraded to below investment grade or default of either the interest or principal amount (in case of unrated debt or money market instruments) and consequently the value of the security falls from Rs. 10,00,000 to Rs. 4,00,000 and the AMC decides to segregate the security into a new portfolio, then the Investors will be allotted the same number of units in the segregated portfolio as they hold in the main portfolio. So, Investor 1 will get 6,000 Units and Investor 2 will get 4,000 units in the segregated portfolio.

With Segregation, the Portfolio Value is Rs. 24,00,000 (Now B & C Securities worth Rs. 20 Lakh and Security A has fallen from Rs 10,00,000 to Rs. 4,00,000).

	Main Portfolio (Security of B & C)	Segregated Portfolio (Security A)
Net Assets	Rs. 20,00,000	Rs. 4,00,000
Number of Units	10,000	10,000
NAV per Unit	Rs. 20,00,000/ 10,000 = Rs. 200	Rs. 4,00,000/ 10,000 = Rs. 40

With respect to Investors:

	Investor 1	Investor 2
Units held in Main portfolio (No. of Units)	6,000	4,000
NAV of Main Portfolio	Rs. 200 per Unit	Rs. 200 per unit
Value of Holding in Main Portfolio (A) (Rs.)	12,00,000	8,00,000
Units Held in Segregated Portfolio	6,000	4,000
NAV of Segregated Portfolio	Rs. 40 Per unit	Rs. 40 Per unit
Value of Holding in Segregated Portfolio (B) (Rs.)	2,40,000	1,60,000
Total Value of Holdings (A) + (B) (Rs.)	14,40,000	9,60,000

In case the portfolio is not segregated, the Total Portfolio after marking down the value of security A would be :

Net Assets of the Portfolio	Rs. 24,00,000	No. of Units	10,000	NAV per unit	Rs. 24,00,000 / 10,000 = Rs. 240
(Rs. 4,00,000 in Security A and Rs. 10,00,000 in Security B and Rs. 10,00,000 in Security C)					

Particulars	Investor 1	Investor 2
Units held in Original portfolio (No. of Units)	6,000	4,000
NAV of Original Portfolio	Rs. 240 Per Unit	Rs. 240 Per Unit
Value of Holding (Rs.)	14,40,000	9,60,000

The AMC / Mutual Fund shall adhere to such other requirements as may be prescribed by SEBI / AMFI in this regard.

Illustration:

Particulars	Regular Plan	Direct Plan
Amount Invested on March 31, 2020	10,000	10,000
Returns before Expenses	1,500	1,500
Expenses other than Distribution Expenses	150	150
Distribution Expenses	40	-
Returns after Expenses as on March 31, 2021	1,310	1,350

Please Note:

- The purpose of the above illustration is purely to explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments.
- It is assumed that the expenses charged are evenly distributed throughout the year. The expenses of the Direct Plan under the Scheme may vary with that of the Regular Plan under the Scheme.
- Calculations are based on assumed NAVs, and actual returns on your investment may be more, or less.
- Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.
